### HÜRNER WeldTrace APP

Quicker, Easier, Safer  
available for HÜRNER Electrofusion and  
Butt-welding Systems

HÜRNER's WeldTrace APP allows smooth  
and direct download of all welding data via  
Bluetooth as a PDF report or in the HÜRNER  
DataWork format. This means easy and  
straightforward recording, management, and  
storage of the information on your projects  
and welded joints. Data are transferred and

saved, using the e-mail or another service, to  
your mobile terminal device, your corporate  
server or computer. As a result, your welding  
and project data are secure, accessible by you  
only, not by any unauthorized individual.

Not only the welding parameters proper are  
transferred, of course. The download includes  
any required traceability data, such as welder  
ID code, job number, additional data, etc.,  
along with the GPS coordinates recorded for  
the joint. The feature is available on both the  
electrofusion welders HST 300 Print+ 2.0,

HST 300 Pricon 2.0, and HCU 300 and the  
butt-welding systems of the CNC ECO 2.0 and  
CNC ECO+ 2.0 Series.

The app enables easy data download via  
Bluetooth and also integrated QR code scan-  
ning from the label printed of the welding  
operation. Add to this the enhanced features  
of HÜRNER's database management applica-  
tion DataWork, and you have the possibility at  
hand to track any welding project or operation  
years later and easy as ABC.
